**Dear Valued 3Win Corp. Customer,**

We want to take a moment to reach out to our valued CCELL partners with a very important message.

Recent legislative activities in specific markets have created confusion and concern, especially as it relates to the topic of heavy metals. At Smoore Technologies/CCELL, we want you to know that we have always focused on the safety of our products. Please rest assured that since the inception of CCELL products, even while legislative requirements did not fully exist, we proactively tested and will continue to test each component we produce. These tests include evaluating our products for heavy metals to ensure they are not a health hazard. Since the launch of CCELL, all our components have passed RoHS testing requirements. (RoHS is an acronym for the Restriction of Hazardous Substances -- a strict directive on the restriction of the use of certain hazardous substances in electronic equipment, as created by the European Union's Parliamentary Council).

It is important to note that this focus on safety is also current and ongoing. We will never stop working to ensure you can rely on CCELL products. Thus, we have provided the [attached document](#) demonstrating that our products have recently passed heavy metals testing at a State of California approved laboratory.

Consumer safety and product satisfaction is, and will always be, our guiding principal. We will always ensure conformance with regulatory requirements, as we have always placed exceedingly high standards on ourselves. As our great industry continues to evolve, we owe this to our valued customers. We will be sure to send further updates on industry testing regulations as they come to light and how our products will continue to be best-in-class in the industry.

Remember, when you choose CCELL, you not only are making the choice to be a part of the original authentic revolutionary ceramic heating technology platform, you are choosing to partner with an industry steward, one that is proud to focus on not only performance, but our customer's safety as well.

Best Regards ,

**CCELL<sup>®</sup>**
